

Methodology: Medicare Shared Savings Program Performance Year Financial and Quality Results PUF

The Medicare Shared Savings Program *Performance Year Financial and Quality Results* public use file (PUF) lists variables related to financial reconciliation and quality performance results for Accountable Care Organizations (ACOs) financially reconciled for the performance year, including ACO-specific data.

The primary data source for financial reconciliation results is CMS calculations of performance year inputs, based on the methodology described in relevant regulations. The primary data source for individual quality measures for ACOs is ACO-submitted data through claims and other data submission interfaces. The “Definition” field in the “Data Dictionary”, provides further information on the data fields.

Note: The unit of observation in this dataset is the ACO. The dataset only includes information on ACOs that were financially reconciled for the relevant performance year.
